

Offsets Bulletin 2008-2

August 28, 2008

The CCX Offsets Committee met for a regular meeting on August 30th, 2008. At the meeting, several modifications to the current offset rules and methodologies were approved for recommendation to the CCX Executive Committee. Such rule changes, subject to approval of the Executive Committee, are pending and subject to revision. A summary of the rule modifications follows.

- Expansion of the scope of eligible projects for the capture and destruction of Ozone Depleting Substances (ODS) to include ODS from any country where production of ODS is phased out, importation is not allowed and destruction is not required by law.
- Revision to the crediting rate for renewable energy generation projects from a standard value of 0.4 metric tons per MWh to region specific values as determined by the U.S. EPA's Emissions and Generation Resource Integrated Database (eGRID) tool.
